RESPONSE TO OFFICE ACTION

Dear Sir:

In response to the Office Action mailed December 3, 2002, it is respectfully requested that the following comments be considered:

FIRST CLASS CERTIFICATE OF MAILING

I hereby certify that this correspondence is being deposited with the United States Postal Service as first class mail with sufficient postage in an envelope addressed to the Assistant Commissioner for Patents, Washington, D.C. 20231

COMMENTS

The enclosed is responsive to the Examiner's Office Action mailed on December 3, 2002. At the time the Examiner mailed the Office Action claims 13 through 44 were pending. By way of the present response the Applicant has not added, canceled or amended any claims. As such, claims 13 through 44 remain pending. The Applicant respectfully requests reconsideration of the present application and the allowance of claims 13 through 44.

The Examiner has rejected independent claims 13, 23, and 37 under 35 USC 102(e) as being anticipated by U.S. Patent No. 6,005,823 (hereinafter, "Martin"). The Examiner has reasoned, without further elaboration, that "Figure 2" of Martin discloses each of the claim elements of the Applicant's independent claims. "To anticipate a claim, the reference must teach every element of the claim" MPEP 2131. The Applicant respectfully submits that "Figure 2" of Martin and its associated discussion (approximately located from Col. 2, line 63 through Col. 4, line 42 of Martin) fails to disclose each and every element of the Applicant's independent claims 13, 23, 37.

In particular, although the circuitry of Figure 2 of Martin receives and processes a command packet (See, Col. 3 lines 2 through 22 of Martin), there does not exist any disclosure or suggestion that a "chunk" of a command packet is passed from a region that is clocked by a first clock to a region that is clocked by a second clock. As such, with respect to claims 13 and 23, Figure 2 of Martin and its corresponding discussion simply fails to disclose or suggest "a memory command

packet chunk output" that stems from a "region clocked by a first clock" or "a memory packet chunk input" directed into a "region clocked by a second clock". Likewise, with respect to claim 37, Figure 2 of Martin and its corresponding discussion simply fails to disclose "generating a memory command packet . . . while clocked by a first clock" and "sending a memory command packet chunk to a . . . region clocked by a second clock".

As such, Figure 2 of Martin and its corresponding discussion fails to disclose or suggest each and every one of the claim elements found in the Applicant's claims. As such, independent claims 13, 23 and 37 are patentable over Martin. The Applicant therefore respectfully requests the allowance of each of claims 13 through 44.

Applicants respectfully submit the present application is in condition for allowance. If the Examiner believes a telephone conference would expedite or assist in the allowance of the present application, the Examiner is invited to call Robert O'Rourke at (408) 720-8300. Authorization is hereby given to charge our Deposit Account No. 02-2666 for any charges that may be due.

Respectfully submitted,

BLAKELY, SOKOLOFF, TAYLOR & ZAFMAN
